

# 2nd International Symposium on Transport Network Reliability

## Conference Proceedings

Christchurch & Queenstown, New Zealand, 20-24 August 2004

# **The Second International Symposium on Transportation Network Reliability (INSTR)**

**Christchurch, New Zealand, August, 2004**

---

## **Conference Organising Committee**

Alan Nicholson (University of Canterbury, NZ): Chair  
Andre Dantas (University of Canterbury, NZ)  
Michael Bell (Imperial College, University of London, UK)  
Yasunori Iida (Kyoto University, Japan)  
Fumitaka Kurauchi (Kyoto University, Japan)  
Michael Taylor (University of South Australia, Australia)  
Erica Dalziell (University of Canterbury, NZ)  
Shane Turner (Beca Consultants, Christchurch, NZ)

## **Conference Organisers**

The Conference Office, University of Canterbury

## **International Scientific Committee**

Michael Bell (Imperial College, University of London, UK): Chair  
Yasunori Iida (Kyoto University, Japan)  
William Lam (Hong Kong Polytechnic University, Hong Kong)  
Michael Taylor (University of South Australia, Australia)  
Yasuo Asakura (Kobe University, Japan)  
Masao Kuwahara (University of Tokyo, Japan)  
Eiichi Taniguchi (Kyoto University, Japan)  
Henk van Zuylen (Delft University of Technology, The Netherlands)  
Seungjae Lee (University of Seoul, South Korea)  
Hai Yang (Hong Kong University of Science and Technology, Hong Kong)  
Hong Lo (Hong Kong University of Science and Technology, Hong Kong)  
Alan Nicholson (University of Canterbury, NZ)  
Hani Mahmassani (University of Maryland, USA)  
Mike Maher (Napier University, UK)  
David Watling (University of Leeds, UK)  
George List (Rensselaer Polytechnic University, USA)  
Xiaoguang Yang (Tongji University, China)  
Pasquale Colonna (Polytechnic University of Bari, Italy)  
Nour-Eddin Elfaouzi (INRETS, France)

---

## **Edited by:**

Alan Nicholson and André Dantas  
Department of Civil Engineering  
The University of Canterbury  
Private Bag 4800  
Christchurch  
New Zealand

## **Papers**

	<b>Page</b>
<i>Introducing reliability into travel demand models</i>	1
John Bates, Clive Gilliam, John Fearon , Ian Black	
<i>An Evaluation of Reliability of Taxi Service Quality</i>	8
K I Wong, Michael G H Bell	
<i>Risk assessment for hazardous materials transportation in a road network</i>	15
Yasuo Asakura	
<i>Assessing the Effect of Congestion on Bus Service Reliability</i>	21
Alan Nicholson, Meng Hui Kong	
<i>The impact of recovery strategies on platform crowding</i>	28
Jan-Dirk Schmöcker, Fumitaka Kurauchi, William Adeney, Michael G H Bell	
<i>Evaluation of delay propagation and network reliability of airline schedules</i>	35
Cheng-Lung Wu	
<i>Evaluation of public transport connectivity reliability using capacity-constrained transit assignment model</i>	42
Fumitaka Kurauchi, Hiroshi Shimamoto, Yasunori Iida, Michael G. H. Bell	
<i>A practical approach to correct bus probe data for evaluating travel time reliability of road network</i>	49
Nobuhiro Uno, Yasunori Iida, Norio Murakami, Shinji Nakagawa	
<i>Practical information provision method on urban network with emergency conditions</i>	56
Takamasa Akiyama, Masashi Okushima	
<i>Travel time reliability in vehicle routing and scheduling with time windows</i>	63
Eiichi Taniguchi, Naoki Ando	
<i>Data fusion of VICS and probe to reduce uncertainty of travel time information</i>	69
Ryota Horiguchi, Hirokazu Akahane, Katsuaki Koide	
<i>Dynamic revenue management of toll road projects under transportation demand uncertainty</i>	75
Takeshi Nagae, Takashi Akamatsu	
<i>Introduction of diversion system to traffic management for accidents on urban expressway</i>	82
Masashi Okushima, Takamasa Akiyama	
<i>Regional accessibility analysis from a vulnerability perspective</i>	89
Katja Berdica, Jonas Eliasson	
<i>Critical infrastructure and transport network vulnerability: developing a method for diagnosis and assessment</i>	96
Michael A P Taylor, Glen M D'Este	
<i>Reliability Evaluation of the Railway Network in the Tokyo Metropolitan Area</i>	104
Kazuyuki Takada, Tomoyuki Yoshizawa, Makoto Fujiu	
<i>Assessment of urban road network quality with the variability of pickup/delivery costs of freight vehicles</i>	109
Tadashi Yamada, Jun T. Castro, Yohei Yoshimura	

## **Papers**

	<b>Page</b>
<i>Urban road network risk analysis after earthquake – Nan-Tou city case study</i>	<b>116</b>
Yung-Lung Lee, Kuang-Yih Yeh, Jing-Pi Shiao	
<i>Reliable Network Design Problem with Stochastic Demand</i>	<b>123</b>
Agachai Sumalee, David Watling	
<i>A Stochastic Network Equilibrium Model with Stochastic Flows: An Extended Model of Wardrop's Equilibrium</i>	<b>131</b>
Shoichiro Nakayama, Jun-ichi Takayama	
<i>Assessing network capacity flexibility of a transportation network</i>	<b>139</b>
Anthony Chen, Panatda Kasikitwiwat	
<i>Towards a new class of doubly dynamic link travel time models</i>	<b>146</b>
Richard Connors, Agachai Sumalee, David Watling	
<i>Evaluating Travel Time Reliability with Multi-Mode and Dependent Link Failure</i>	<b>153</b>
Agachai Sumalee & Watling	
<i>Investing for robustness and reliability in transportation networks</i>	<b>160</b>
Lei Zhang, David Levinson	
<i>A procedure for evaluating the trip reliability benefits from individual roading projects</i>	<b>168</b>
Matt Ensor	
<i>Assessing natural hazard risks across a geographically dispersed road network</i>	<b>175</b>
Erica Dalziell	
<i>Reliability and vulnerability versus costs and benefits</i>	<b>182</b>
Jan Husdal	
<i>Evaluation of benefit cost of using disaster management in road-based transportation network</i>	<b>190</b>
Afshin Shariat Mohaymany, Nazli Dehghani, Shams Nowbakht, Mohammad Elahi	
<i>A method to form the program of road network provision based on social reliability</i>	<b>197</b>
Hiroshi Inouye	
<i>Network reliability improvement: probability importance and criticality importance</i>	<b>204</b>
Hiroshi Wakabayashi	
<i>Toward an efficient travel time estimation for transportation network reliability assessment based on multisource data fusion</i>	<b>211</b>
Nour.-Eddin. El Faouzi	
<i>A method for evaluating the operational reliability of a transportation network</i>	<b>218</b>
Vânia Barcellos Gouvêa Campos, Paulo Afonso Lopes da Silva Da Silva	

## **Papers**

	<b>Page</b>
<i>Study on uncertainty in travel time on congested urban expressways</i>	224
Takamasa Iryo, Eisuke Morita, Yasuo Asakura	
<i>User response to uncertainties, an imperfect information approach</i>	231
Francesco Viti, Henk J. van Zuylen	
<i>Measuring individual residence's accessible probability by using geographical information systems</i>	239
Yan Li	
<i>Driver's behaviour analysis under strategic toll charging system to improve road travel reliability</i>	245
Michiyasu Odani, Hideo Yamanaka	
<i>The effect of irregularity of travel times on departure time choice</i>	253
Henk J. van Zuylen	
<i>Finding the best routing strategies for on-time arrival in stochastic networks</i>	260
Yueyue Fan, Yu Nie, Anthony Chen	
<i>Vulnerability quick scan of a national road network</i>	267
Johann Visser, Lindy Molenkamp	
<i>An Impact Analysis on Disconnecting a Major Expressway</i>	274
Seungjae Lee, Shinhae Lee, Young-Ihn Lee
