### DESIGN STUDIO 2 POSTER COMPETITION 2010—2 June

The winning team is pictured with their Mentor, David Compton-Moen from MWH. Photo of the winning poster.

Tim Perigo helping Rowan McComish with his Science Fair Project experiment

Rowan McComish, a year eight student from Cobham Intermediate busy in the Structures lab conducting his experiment for his Science Fair Project making building blocks out of recycled materials.

He needed a facility that do testing for insulation levels (R values) and for strength ( compression) - this his own words in the well worded email to the College of Engineering. The request was rather urgent as "I'm 2 weeks behind and need to get my experiment done. "Of course it was difficult to say no and the lab technicians Tim and Nigel was happy to help Rowan achieve a successful outcome with his project.
